**LBRY** @LBRYio · 13 Mar 2018

We want to make it as easy as possible for users to acquire LBC in app, and an integrated Coinbase gateway could be one way to do that.

**Thomas Zarebczan** @TomZarebczan · 13 Mar 2018

It would allow users to purchase BTC/LTC/ETH through a Coinbase widget (support for new and existing users) and convert the funds to LBC in their wallet automatically.

Ah i see. People dont have to buy and transfer lbc through trex or polo. By the way how is binance listing going? :)

I just updated the roadmap item with that information. It's also useful because credit cards and bank accounts can be used to buy LBC.

Binance is tough, I don't think we have enough investor support (hype?) to win a voting round, at least not yet. Otherwise the fee is too high.
